

# Overhead Crane Operator Safety Training

## Operator & Instructor Courses

### Benefits of our Safety Training:

- Achieve cost savings & eliminate wasted resources
- Increase crane uptime & operator productivity
- Reduce crane maintenance & operating costs
- Avoid costly damage to goods, crane & rigging
- Prevent dangerous incidents & accidents
- Improve health & safety practices
- Lower WSIB/Workers Comp payments
- Diminish the number of insurance claims
- Gain peace of mind with skilled & effective operators

### Training Highlights:

- Classroom instruction & examination
- Hands-on training & evaluation
- Correct load calculation & rigging procedures

### Compliant to:

- Provincial Occupational Health and Safety Act
- CSA B167-08 Overhead Cranes – *new revision*
- ANSI/ASME Standard B30 Series
- Federal Bill C-45

“John Wickson conducted an in plant Train-the-Trainer program. We found John to be very knowledgeable with the practical operations and regulations related to overhead cranes. Our plant is very pleased with the services provided by John.” ...Dave Outram – Technical Business Manager Oshawa Metals Centre, General Motors of Canada

“Having our crane operators trained has made significant improvement for our operations department in managing our work, increasing our efficiencies and reducing our operating costs.” ...Angelo Foti – Redpath Sugar Safety & Security Manager, Toronto

“We found the level of training to be of very good economic value as well as something sound for the employees rather than just the *due diligence* training offered by some other trainers.”...Tim Roberts – Trim Trends Plant Manager
